BAYAN ALHARBI

PROFESSIONAL SUMMARY

Seeking to work at a leading company with a position in Information Technology, which would best utilize my skills and enthusiasm to make a significant contribution and add value to the organization. Able to communicate effectively with all levels of staff and management. Proficient analytical and logical troubleshooting skills as well as able to assess and recommend solutions that facilitate IT business requirements and processes.

WORK HISTORY

Data Analyst, 05/2023 to 12/2023
Medina Regional Municipality - Medina

- Generated data visualisations to present and communicate analysis results using Power BI
- Analyzed large datasets, drawing meaningful conclusions and providing actionable recommendations
- Improved data integrity through rigorous auditing and cleansing processes
- Diagnosed and resolved performance, connectivity, security, and database corruption issues, ensuring efficient data operations.

EDUCATION

Bachelor's degree, Computer science, 08/2018 to 08/2023
TAIBAH University - Medina
GPA: 4.8

Data+ Research Program, 05/2024 to 08/2024
Duke University - USA
Engaged in Duke University's esteemed Data+ research program, emphasizing interdisciplinary collaboration and data-driven problem-solving. Collaborated with a team to address real-world challenges, employing advanced data analysis techniques (such as Python, R, and Tableau) for extensive data collection, cleaning, preprocessing, statistical analysis, and visualization.

Bioinformatics program, 09/2023 to 03/2024
KAUST Academy - Jeddah
The Bioinformatics Program combines biology, computer science, and statistics to analyze biological data, enabling the extraction of insights from large datasets and advancements in medical research and personalized medicine. It explores genomics, proteomics, and other biological information to understand complex processes and unravel intricacies of living systems.
